Anesthesia Oral Boards Review Course - Ultimate Board ...
Anesthesia or anaesthesia (from Greek "without sensation") is a state of controlled, temporary loss of sensation or awareness that is induced for medical purposes. It may include analgesia (relief from or prevention of pain), paralysis (muscle relaxation), amnesia (loss of memory), or unconsciousness. A patient under the effects of anesthetic drugs is referred to as being anesthetized.

Anesthesia - Wikipedia
OpenAnesthesia™, sponsored by the International Anesthesia Research Society, is an online multimodal toolkit specifically designed to advance graduate medical education in anesthesia.

Anesthesia & Analgesia - journals.lww.com
Attempts at producing a state of general anesthesia can be traced throughout recorded history in the writings of the ancient Sumerians, Babylonians, Assyrians, Egyptians, Greeks, Romans, Indians, and Chinese. During the Middle Ages, which correspond roughly to what is sometimes referred to as the Islamic Golden Age, scientists and other scholars made significant advances in science and medicine ...

**Management of Postoperative Pain: A Clinical Practice**

Add the intravenous modality to your dental practice with our oral sedation dentistry courses. Our philosophy defines patient anxiety control as a continuum from nitrous oxide inhalation, to oral sedation, to intravenous procedural sedation (light-moderate-deep), to a consultation with a general anesthesiologist.
