Biology An Australian Perspective

1. INTRODUCTION - OVERVIEW - Biology as a science deals with the origin, history, process, and physical characteristics, of plants and animals: it includes botany, and zoology. A study of biology includes the study of the chemical basis of living organisms, DNA. Other related sciences include microbiology and organic chemistry.

Biology - 101science.com

The history of biology traces the study of the living world from ancient to modern times. Although the concept of biology as a single coherent field arose in the 19th century, the biological sciences emerged from traditions of medicine and natural history reaching back to ayurveda, ancient Egyptian medicine and the works of Aristotle and Galen in the ancient Greco-Roman world.

The need for a clearly defined and consistent invasion biology terminology has been acknowledged by many sources. Invasive species, or invasive exotics, is a nomenclature term and categorization phrase used for flora and fauna, and for specific restoration-preservation processes in native habitats. Invasion biology is the study of these organisms and the processes of species invasion.

Abstract: Policies to reduce global warming by offering credits for carbon sequestration have neglected the effects of forest management on biodiversity. I review properties of forest ecosystems and management options for enhancing the resistance and resilience of forests to climate change.

Beyond Kyoto: Forest Management in a Time of Rapid Climate ...

Public policy documents on gender and health mostly rely on categorical understandings of gender that are now inadequate. Poststructuralist thought is an advance, but relational theories of gender, treating gender as a multidimensional structure operating in a complex network of institutions, provide the most promising approach to gendered embodiment and its connection with health issues.

Gender, health and theory: Conceptualizing the issue, in ...

Crosstalk 8245 Molecular biological access to the chemistry of unknown soil microbes: a new frontier for natural products, Jo Handelsman, Michelle R Rondon, Sean F Brady, Jon Clardy2 and Robert M Goodman! Cultured soil microorganisms have provided a rich source of natural-product

Dominant ideas. Complex developmental trauma: Complex trauma refers to the impact of children's exposure to traumatic events on their development and long-term outcomes, in the context of interpersonal relationships with caregivers (Cook et al., 2003; Cook et al., 2005). It is thought that in this context, the neurological development of the brain becomes distorted such that the "survival ...
