Here’s my perspective as a former public school student and current private school teacher. What education in America needs, more than anything else at this point, is a lot more truth in the conversation. Once that happens, the solutions will be o...

How can we solve the problems with public education in ...
N-back is a kind of mental training intended to expand your working memory (WM), and hopefully your intelligence (IQ 1). The theory originally went that novel 2 cognitive processes tend to overlap and seem to go through one central bottleneck. As it happens, WM predicts and correlates with IQ 3 and may use the same neural networks 4, suggesting that WM might be IQ 5.

Spaced repetition is a centuries-old psychological technique for efficient memorization & practice of skills where instead of attempting to memorize by ‘cramming’, memorization can be done far more
efficiently by instead spacing out each review, with increasing durations as one learns the item, with the scheduling done by software.

In a previous post, I described a scenario in which an administrator clearly did not understand the impact on student learning a teacher must demonstrate to renew National Board Certification. If you’re wondering, too, read on. And if you’re a renewal candidate, here are the files you’ve been looking for. I’ve answered more than 100 emails this past week, asking for renewal help.
