What are Mutual Funds? A Mutual Fund is essentially a company that collects money from different investors and then allocates them in a variety of investment options like stocks, bonds, money market instruments, and others.. If owning stocks lets you directly buy a piece of a company, being a mutual fund investor lets you pick a basket containing portions of stocks bought from different companies.

Soon after the Sebi came out with a circular on 'TER and performance disclosure of mutual funds' last month, some mutual funds changed the structure of the Total Expense Ratio or TER of some of their schemes. The revised TER showed a significant reduction in the expenses of direct plans. However, the change was not noticeable in the TER of regular plans.

### **TER of regular plan in mutual funds may not fall ...**

Mutual Funds. A mutual fund is an investment fund that is professionally managed and pools money from investors to purchase securities. Mutual funds typically charge annual fees of 0.50-2% and are generally comprised of stocks and/or bonds.. Now that you know what they are, it's time to explore these options and give you a better understanding of each.
