In 1999, Harvard University published the English edition of The Black Book of Communism, whose six co-authors devoted 850 pages to documenting the horrors inflicted upon the world by that defunct system, which had produced a total death toll they reckoned at 100 million. I have never read that book and I have often heard that the alleged body-count has been widely disputed.

Today's consumption has led to a number of problems from environmental degradation to the effects of social inequalities. This section looks at how consumption has developed in the last few decades and centuries. It is not just a natural thing of market forces, but conscious decisions by governments and companies to help promote changes in culture to increase consumption.
