Attitudes about Aging. An attitude is a feeling, value, or belief about something that determines behavior (Meiner, 2015). For example, if a nurse has the attitude that characterizes older adults as less healthy, less alert, and more dependent, then his or her initial assessment of the patient will reflect this attitude.

Nutrition is the science that interprets the interaction of nutrients and other substances in food in relation to maintenance, growth, reproduction, health and disease of an organism. It includes food intake, absorption, assimilation, biosynthesis, catabolism, and excretion. The diet of an organism is what it eats, which is largely determined by the availability and palatability of foods.

Sweet potatoes also have only 90mg of omega-6 per cup compared to the same amount of wheat cereal delivering 452mg. Grains are a big source of omega-6s, the kind of inflammatory fats that should be consumed less, not more. The foods with the highest omega 6’s are vegetable oils (margarine, commercial salad dressings) and another huge sources is grains, yes, even whole grains.
