Newcastle Hospitals - Services and treatments

In 2008, evidence for tuberculosis infection was discovered in human remains from the Neolithic era dating from 9,000 years ago, in Atlit Yam, a settlement in the eastern Mediterranean. This finding was confirmed by morphological and molecular methods; to date it is the oldest evidence of tuberculosis infection in humans.

History of tuberculosis - Wikipedia

Jaw reduction is a procedure that involves narrowing the jaw, either through minimally invasive or surgical methods. In cases where a wide jaw is due to an enlarged muscle, Botox can be injected, causing the muscle to become smaller over the course of a few months. If the jawbone itself is wide, surgery can be performed to remove the outer layer of the bone.

A ballistic vest or bullet-resistant vest, often called a bulletproof vest, is an item of personal armor that helps absorb the impact and reduce or stop penetration to the body from firearm-fired projectiles and shrapnel from explosions, and is worn on the torso. Soft vests are made of many layers of woven or laminated fibres and can protect the wearer from small-calibre handgun and shotgun ...
