Military transport aircraft or military cargo aircraft are used to airlift troops, weapons and other military equipment to support military operations. Transport aircraft can be used for both strategic and tactical missions, and are often diverted to civil emergency relief missions.

Military transport aircraft - Wikipedia

This military transport aircraft made its first flight in 2010 and became operational with Chinese air force in 2012. The Y-9 can carry 25 000 kg of cargo. Though reportedly this aircraft will also take off overloaded with 30 000 kg of cargo. This transport aircraft can carry 106 passengers, 132 paratroopers, or 72 stretchers.

Top 10 Largest Military Transport Aircraft | Military ...

Transport airplanes are airplanes for which a type certificate is applied for under part 21 in the transport category and that meet the transport category airworthiness requirements. Multi-engine airplanes with more than 19 seats or a maximum takeoff weight greater than 19,000 lbs must be certificated in the transport category.

Transport Airplanes - Federal Aviation Administration

Embraer's chunky-looking tanker-transport aircraft is making its debut at Farnborough as the first stop on an international sales tour of Europe and the Middle East.

Boeing 747 Dreamlifter. A number of the biggest cargo planes in the world are variations of the Boeing 747. The 747-8 Freighter, a cargo version of the passenger 747-8 Intercontinental, is actually a heavier plane—with an almost 900,000-pound maximum takeoff weight.

11 of the Largest Cargo Planes in the Sky - Popular Mechanics

For many knitters, the idea of spending a long flight with nothing to knit is enough to make them seriously reconsider a holiday abroad. Fortunately, you can take knitting needles on a plane (we'd opt for wooden, plastic or bamboo to be safe), even in your hand luggage. Airport security. Knitting needles are not banned from flights.
