Computer science is the study of processes that interact with data and that can be represented as data in the form of programs. It enables the use of algorithms to manipulate, store, and communicate digital information. A computer scientist studies the theory of computation and the practice of designing software systems. Its fields can be divided into theoretical and practical disciplines.

Highlights We examined the detrimental effects of laptop multitasking on classroom learning. Learners who multitasked during class had reduced comprehension of lecture material. Learners in view of multitaskers also had reduced comprehension of lecture material. Multitasking or being seated around multitaskers impedes classroom learning.
