9. Building Feature Based Grammars. Natural languages have an extensive range of grammatical constructions which are hard to handle with the simple methods described in 8..In order to gain more flexibility, we change our treatment of grammatical categories like S, NP and V.In place of atomic labels, we decompose them into structures like dictionaries, where features can take on a range of values.

9. Building Feature Based Grammars

This course teaches a calculus that enables precise quantitative predictions of large combinatorial structures. In addition, this course covers generating functions and real asymptotics and then introduces the symbolic method in the context of applications in the analysis of algorithms and basic structures such as permutations, trees, strings, words, and mappings.
