MEDIHONEY® is an advanced wound care dressing that is supported by over 160 pieces of evidence demonstrating its clinical ability to promote the removal of necrotic tissue and advance a wound toward healing. In a randomized controlled trial, the mean healing time was significantly faster for wounds treated with MEDIHONEY® impregnated dressings when compared to conventional dressings 4.

Foam-lined Compression garments bring enhanced compression technology to patients with primary and secondary lymphedema. Designed primarily for nighttime use, they improve upon multi-layer wraps that are conventionally prescribed as part of a normal course of Complete Decongestive Physiotherapy (CDT), these products have demonstrated significant improvement due to their comfort and ease of use.

### **Lymphedema Night Garment - BioHorizon**

BioHorizon provides compression therapy products and wound care supply faster, simpler and smarter! Whether you're looking for compression sleeves or other compression garments, lymphedema products like a lymphedema pump, a sequential compression device or other products, you can count on us to give our time, guidance and support.

UT Southwestern students are united to serve. Dozens of UT Southwestern students are showing what it means to care for the community. They spent a recent Saturday hosting a free health fair at Thomas J. Rusk Middle School that offered much more than just screenings and health education for the hundreds who attended the event.
