Designing Training Programs Second Edition
What types of balance training activities can be used with older adults? In addition to flexibility and resistance training, exercise programs specifically designed to improve the functional ability of the lower extremities may be effective for improving balance and preventing falls in older adults.

Designing balance training programs - human-kinetics
Social and emotional learning (SEL) is the process through which children and adults acquire and effectively apply the knowledge, attitudes, and skills necessary to understand and manage emotions, set and achieve positive goals, feel and show empathy for others, establish and maintain positive relationships, and make responsible decisions.

Casel Secondary Guide Beta
The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policymakers and development practitioners.

If you are a clinical researcher trying to determine how many subjects to include in your study or you have another question related to sample size or power calculations, we developed this website for you.

Sample Size Calculators - Sample Size Calculators
Weight training is a common type of strength training for developing the strength and size of skeletal muscles. It utilizes the force of gravity in the form of weighted bars, dumbbells or weight stacks in order to oppose the force generated by muscle through concentric or eccentric contraction. Weight training uses a variety of specialized equipment to target specific muscle groups and types of ...
