A barrage of criticism from global health scholars in disciplines ranging from economics to anthropology immediately followed the introduction of the disability-adjusted life year, or DALY, in 1994.

The Rise, Critique and Persistence of the DALY in Global ...
Disability is a contested concept, with different meanings in different communities. It may be used to refer to physical or mental attributes that some institutions, particularly medicine, view as needing to be fixed (the medical model). It may refer to limitations imposed on people by the constraints of an ableist society (the social model). Or the term may serve to refer to the identity of ...
