### **Electronic Distance Measurement An Introduction**

Electronic Distance Measurement This text gives an up-to-date introduction into electronic distance measurement (EDM) with a comprehensive review of modern equipment and procedures. It is excellently suited as a text for undergraduate and graduate students and an invaluable reference for practicing surveyors, geodesists and other scientists using EDM as a measuring tool.

Electronic Distance Measurement (EDM) is a fundamental feature of modern surveying Total Stations. Distance measurements can be made in two modes: [1] with a reflector using an Infrared or visible laser electromagnetic wave and phase measurement or [2] 'reflectorless' using a visible laser beam and pulse time of flight.

Electronic Distance Measurement Instrument- Types, Functions & Operations. Still it gained a disadvantage of limited range of measurement. It is limited to 15 to 150m with an accuracy of 1 in 1000 to 1 in 10000. Above all we have EDM with an accuracy of 1 in 10<sup>5</sup>, having a distance range of 100km.

Distance measurement. Most total stations use purpose-built glass prism (surveying) reflectors for the EDM signal. A typical total station can measure distances with an accuracy of about 1.5 millimeters (0.0049 ft) + 2 parts per million over a distance of up to 1,500 meters (4,900 ft).

### **Download Electronic Distance Measurement: An Introduction [P.D.F]**

To simplify the procedures to obtain accuracy in surveying, the electronic distance measuring method was introduced. Here the distance is measured with the help of electro-magnetic waves such as micro wave, infra red wave and other similar waves. Here the electronic distance measuring equipment and a reflector are necessary to carry out the survey.

Electronic distance measurement (EDM) instruments, such as laser trackers, total stations, and handheld laser distance meters, have been used in a limited number of nondestructive testing (NDT) and structural health monitoring (SHM) applications attempting to measure bridge deflections and vibrations.
