Intervertebral disc degeneration is a major cause of low back pain. Despite its long history and large socio-economical impact in western societies, the initiation and progress of disc degeneration is not well understood and a generic disease model is lacking.

There is intense interest in graphene in fields such as physics, chemistry, and materials science, among others. Interest in graphene's exceptional physical properties, chemical tunability, and potential for applications has generated thousands of publications and an accelerating pace of research, making review of such research timely.

here, the ultimate Goal represents the given problem, which is usually expressed in the form of an objective function. The Sample is a subset of the population that is selected for study in some prescribed manner .In general, data preprocessing, including data cleaning and feature engineering, is employed to convert the original data into the Sample. ...

Fluorescence quenching rate constants, k_q , ranging from 10^6 to $2 \times 10^{10} \text{ M}^{-1} \text{ sec}^{-1}$, of more than 60 typical electron donor-acceptor systems have been measured in de-oxygenated acetonitrile and are shown to be correlated with the free enthalpy change, ΔG^\ddagger , involved in the actual electron transfer process . in the encounter complex and varying between + 5 and -60 kcal/mole.
