I have visited two dairy farms in the last couple of weeks. One belongs to Henry, my neighbor here in Vermont. I stopped by his place to pick up a dozen bales of mulch hay to spread on my garden, and he invited me into the barn to meet Ernie, a three-week-old bull calf he seemed particularly proud of.

A Tale of Two Dairy Farms (One of Which Milks 30,000 Cows)

The weight of dairy market volatility started to feel overwhelming in January, he said, after frigid temperatures caused the parlor pipes to freeze and his herd blew through feed to keep warm and produce milk.

Wow, I have never heard of a cow having quads before and how fab that they are all heifers. We have had 3 sets of twins so far this year - 2 sets were one male one female so of course, the heifer will be infertile and one had two tiny little heifer calves the other day. 3 more have scanned to have twins so we'll wait and see.

How many Babies do cows have? | Dairy Moos

Milk is a nutrient-rich, white liquid food produced by the mammary glands of mammals. It is the primary source of nutrition for infant mammals (including humans who are breastfed) before they are able to digest other types of food. Early-lactation milk contains colostrum, which carries the mother's antibodies to its young and can reduce the risk of many diseases.

Bovine somatotropin or bovine somatotrophin (abbreviated bST and BST), or bovine growth hormone (BGH), is a peptide hormone produced by cows' pituitary glands. Like other hormones, it is produced in small quantities and is used in regulating metabolic processes. After the biotech company Genentech discovered and patented the gene for BST in the 1970s, it became possible to synthesize the ...

Great article Kristen! Too many people thing that organic is the be all and end all of healthy food. It took me about a year to make my wife realize that organic snack food isn't healthy just because it's organic (I'm still not sure she's convinced ☹☹) Although less obvious, this is certainly the case with milk.
