Leather Care - Russell Moccasin

Matte finish: A flat or dull finish. Milling: The leather is tumbled or "milled" in a large drum to produce a softer more pliable product. Many times this operation can create a slight "pebble" appearance in the surface of the leather. Naked leather: A dyed leather which has received no topical application that may mask or alter the natural state of the leather.

Leather Buying Guide - Waterhouse Leather

Dear Readers, Alas, here is the content that you have all been waiting for. As you will see, I have written it in detailed form as well as provided an instructional video at the very bottom of this post, of which both will hopefully allow you to learn how to shine your shoes properly.

Polish Your Shoes Properly - The Shoe Snob Blog

For most pointe shoes, the sole is constructed from a piece of leather that is attached to the shoe with adhesive and reinforced by stitching along its edges. The sole overlaps and secures the unfinished edges of the shoe's exterior fabric. Pointe shoes may be manufactured with either scraped soles, which provide superior traction, or buffed soles, which have a smoother surface for reduced ...

Pointe shoe - Wikipedia

One summer day in 2006, the shoes Anita wore (300 pairs of red, white and black beautiful clogs from the '70s) were found in the basement of an old clog factory in the neighboring village and brought them to Stockholm.
