The ways adults learn have a great effect on their ability to acquire and apply knowledge, seek learning experiences, and enjoy participating in the education process. All adults have learning styles that best suit them. Adults often have a preference for one style over another, but these preferences may vary depending on the situation and how learning objectives are to be achieved.

Teachers often debate which is worse: A noisy class of students or a quiet one. In terms of teaching strategies, a noisy group can be difficult to control and lead through a lesson; although they might also be easier to engage in activities and discussions. On the other hand, a quiet class is easily communicated to, but there is a struggle to get them excited, engaged or participative.

### **THE ROLE OF LEARNING STYLES IN THE TEACHING/LEARNING PROCESS**

Learning styles refer to a range of competing and contested theories that aim to account for differences in individuals' learning. These theories propose that all people can be classified according to their 'style' of learning, although the various theories present differing views on how the styles should be defined and categorized.: 8 A common concept is that individuals differ in how they learn.

### **Learning styles - Wikipedia**

The term teaching method refers to the general principles, pedagogy and management strategies used for classroom instruction.. Your choice of teaching method depends on what fits you — your educational philosophy, classroom demographic, subject area(s) and school mission statement.
