The Learning Mind Blog is a pioneering educational initiative, which explores the latest research in
Mind, Brain, and Education (MBE) science. Essentially, we study the way that people learn best.
Here is how it works: Research from a cross-section of psychological and neuroscientific studies
gives us better insight into how the brain works.

About Us | The Learning Mind
Mind, Brain, and Education is now accepting the submission of Registered Reports in which
methods and proposed analyses are pre-registered and peer-reviewed prior to research being
conducted. For further information on this article type please refer to this article by the Center for
Openness in Science. The guidelines for the submission of Registered Reports can be found here.

Mind, Brain, and Education - Wiley Online Library
So then, what do teachers need to know about the brain? Immordino-Yang, who also serves as
president for the International Mind, Brain and Education Society, says what’s more important than
neuroscience is for teachers to know how humans and their brains develop. “Teachers should be
society’s experts on human development,” she believes.

Brain Science and Education: How Much Should Teachers Know ...
Mind, Brain and Education (MBE) the official journal of IMBES; publishes multidisciplinary original
research, reviews and commentaries that may touch upon all three disciplines, or a combination of
Mind and Education or Brain and Education.
