**COMPETENCY FRAMEWORK - OECD**

Consumer behaviour is the study of individuals, groups, or organizations and all the activities associated with the purchase, use and disposal of goods and services, including the consumer’s emotional, mental and behavioural responses that precede or follow these activities. Consumer behaviour emerged in the 1940s and 50s as a distinct sub-discipline in the marketing area.

Organization development (OD) is the study of successful organizational change and performance. OD emerged from human relations studies in the 1930s, during which psychologists realized that organizational structures and processes influence worker behavior and motivation. More recently, work on OD has expanded to focus on aligning organizations with their rapidly changing and complex ...

1. Introduction. Health, safety, and well-being at work (HSW) represent important values in themselves. It seems, however, that other values can positively or negatively contribute to HSW.

The term ‘Design Thinking’ has been part of the collective consciousness of design researchers since Rowe used it as the title of his 1987 book (). The first Design Thinking Research Symposium was an exploration of research into design and design methodology, viewed from a design thinking perspective (Cross, Dorst, & Roozenburg, 1992). Multiple models of design thinking have emerged since ...
