

Pagets Disease Of The Bone Ppt

Pagets Disease Of The Bone

Symptoms. Pelvis. Paget's disease of bone in the pelvis can cause hip pain. Skull. An overgrowth of bone in the skull can cause hearing loss or headaches. Spine. If your spine is affected, nerve roots can become compressed. This can cause pain, tingling and numbness in an arm or leg. Leg.

Paget's disease of bone - Symptoms and causes - Mayo Clinic

Epidemiology. Paget's disease of bone is the second most common metabolic bone disorder, after osteoporosis. The overall prevalence and severity of Paget's disease are decreasing; the cause for these changes is unclear. Paget's disease is rare in people less than 55 years of age, and the prevalence increases with age.

Paget's disease of bone - Wikipedia

Living With Paget's Disease of Bone. Ask your doctor about ways to keep your bones healthy. Here are a few tips: Take calcium and vitamin D supplements. Get regular exercise. Don't put lots of stress on the affected bones. Use a splint if a certain bone is at risk for breaking.

Paget's Disease of Bone: Symptoms, Diagnosis, Treatment

Summary. Paget's disease of bone causes your bones to grow too large and weak. They also might break easily. The disease can lead to other health problems, too, such as arthritis and hearing loss. You can have Paget's disease in any bone, but it is most common in the spine, pelvis, skull, and legs.

Paget's Disease of Bone | MedlinePlus

Fast Facts. Paget's disease typically occurs in an older population. Signs of Paget's disease of bone include: pain associated with bones and joints, headaches, hearing loss, enlargement or bowing of bones, tingling or numbness. A physician needs to evaluate the condition to make sure there are no related problems.

Paget's Disease of Bone - American College of Rheumatology

Paget's disease is a chronic disorder that can result in enlarged and misshapen bones. The excessive breakdown and formation of bone tissue causes affected bone to weaken—resulting in bone pain, misshapen bones, fractures, and arthritis in the joints near the affected bones.
