

Pentair Minimax Nt E04

Pentair Minimax Nt E04

Changed the water temp sensor etc. everything started back up fine for about 2 hours then E04 again!!!! I jumped the air pressure switch and everything started again just fine. I let it run a while and when I came back the blower was off but the flames were still burning so I turned off power at the breaker.

Pentair Minimax NT with error code E04 | Trouble Free Pool

If you have a Pentair MiniMax NT and are experiencing technical issues, this blog is for you. One of the reasons it is so hard to diagnose technical issues online is because every pool and every heaters are different.

Pentair Minimax NT Heater Error Codes - INYOPools.com

SOURCE: E04 comes on after fan purge cycle-Pentair minimax nt pool heater. This is a fan failure code. It can mean the fan has problems (not likely if the fan goes and isn't labored) You have a sensor in your exhaust (probably not this if you don't get a good start) The culprit is probably in the negative pressure sensor.

SOLVED: We have the Pentair Minimax NT Heater. The E04 - Fixya

Tagging along with my issue: Fan runs well Unit ignites for ~3 seconds and then stops Tries maybe 3 times and then E04 It happens every year when I start up the pool, in the past spiderwebs were the issue.
