The philosophy of motion is important in the study of theories of change in natural systems and is closely connected to studies of space and time in philosophy. The philosophy of motion was of central concern to Ancient Greek and Roman philosophers, particularly the pre-Socratic philosophers such as Parmenides , Zeno of Elea , Heraclitus and Democritus .

The starting point of Marxist philosophy is that everything is in constant motion. Change is a consequence of this motion. Some of this is obvious, some of it more subtle. The universe itself is expanding, the galaxies within it revolving, and planets circle stars. The oceans move under the gravitational influence of The Moon, rivers ebb and flow.
