Political Economy African Famine Food

A famine is a widespread scarcity of food, caused by several factors including war, inflation, crop failure, population imbalance, or government policies. This phenomenon is usually accompanied or followed by regional malnutrition, starvation, epidemic, and increased mortality. Every inhabited continent in the world has experienced a period of famine throughout history.

Famine - Wikipedia

Political ecology is the study of the relationships between political, economic and social factors with environmental issues and changes. Political ecology differs from apolitical ecological studies by politicizing environmental issues and phenomena. The academic discipline offers wide-ranging studies integrating ecological social sciences with political economy in topics such as degradation ...

Political ecology - Wikipedia

Famine: Famine, severe and prolonged hunger in a substantial proportion of the population of a region or country, resulting in malnutrition and starvation. Famines usually last for a limited time, ranging from a few months to a few years, and can result in death by starvation and disease.

Africa - Economy: With the exception of South Africa and the countries of North Africa, all of which have diversified production systems, the economy of most of Africa can be characterized as underdeveloped. Africa as a whole has abundant natural resources, but much of its economy has remained predominantly agricultural, and subsistence farming still engages more than 60 percent of the population.
