Postharvest Ethylene: A critical factor in quality management.
Responses to Ethylene . The main symptoms of ethylene exposure are yellowing, epinasty (stem curvature) and leaf abscission. Some herbs (marjoram, mint, parsley, organo) are very sensitive to ethylene exposure, while others (sage, thyme, basil, rosemary) are minimally affected or do not respond at all.

Fresh Cut Flower Care and Handling, Make Flowers Last Longer,
Increase Resin & Terpene Production . So you want to increase your resin and terpene(oil) production there’s a few ways to do this. The first way could also be the most cost, and that would be switching to L.E.D lighting which is indeed the future for the cannabis farmer, we are not talking about L.E.D lighting from 2+years ago.
