Psychological trauma is a type of damage to the mind that occurs as a result of a distressing event. Trauma is often the result of an overwhelming amount of stress that exceeds one's ability to cope, or integrate the emotions involved with that experience. Trauma may result from a single distressing experience or recurring events of being overwhelmed that can be precipitated in weeks, years ...

Traumatic brain injury (TBI), also known as intracranial injury, occurs when an external force injures the brain. TBI can be classified based on severity, mechanism (closed or penetrating head injury), or other features (e.g., occurring in a specific location or over a widespread area). Head injury is a broader category that may involve damage to other structures such as the scalp and skull.

x Commonly reported incidence rates for endometrial cancer (EC) fail to take into account both the large number of hysterectomies performed each year and the dynamic change in hysterectomy rate over the past decade. Large racial differences in pre-menopausal hysterectomy rates between Black and White women in the US likely affect calculation of race-based risk.
