Sociocultural Psychology Theory And Practice
Sociocultural theory is an emerging theory in psychology that looks at the important contributions that society makes to individual development. This theory stresses the interaction between developing people and the culture in which they live.

What Is Sociocultural Theory? - Verywell Mind
The sociocultural perspective is a theory used in fields such as psychology and is used to describe awareness of circumstances surrounding individuals and how their behaviors are affected specifically by their surrounding, social and cultural factors. According to Catherine A. Sanderson (2010) “Sociocultural perspective: A perspective describing people’s behavior and mental processes as ...”

Sociocultural perspective - Wikipedia
Cultural-historical psychology is a branch of psychological theory and practice associated with Lev Vygotsky and Alexander Luria and their Circle, who initiated it in the mid-1920s-1930s. The phrase "cultural-historical psychology" never occurs in the writings of Vygotsky, and was subsequently ascribed to him by his critics and followers alike, yet it is under this title that this intellectual ...

1. Introduction. This paper examines research on school bullying through the lens of sociocultural theorising. Whilst there is a proliferation of empirical research on bullying that has helped us to understand its nature, characteristics, and experiences of those involved (Smith, 2015), we argue that there has been less emphasis in the literature on providing a coherent theoretical ...

The Social Comparison Theory was developed by social psychologist Leon Festinger. There are two versions of this theory. The old one states that members of a particular group would want to be parallel with each other because a uniform agreement must be made so that the group is able to come up with a common decision.

List of Theories - Communication Theory
The Theory-Theory of Concepts. The Theory-Theory of concepts is a view of how concepts are structured, acquired, and deployed. Concepts, as they will be understood here, are mental representations that are implicated in many of our higher thought processes, including various forms of reasoning and inference, categorization, planning and decision making, and constructing and testing explanations.
