Is there fluoride in kombucha? Yes. There is a lot of fluoride in kombucha, because there is a lot of fluoride in tea. Which is why I stopped drinking it. If you're suffering from hormonal problems, migraine headaches, cysts in your breasts or ovaries, cavities, bone loss, or other health challenges, it could be the fluoride in the tea you're drinking. Read on to 

Fluoride in Kombucha: Why I Stopped Drinking Kombucha and Tea
The five-time Pro Bowler also went just 62-63-4 as a starter during the regular season, but he delivered on arguably the most brazen guarantee in sports history, and he created a persona and ...
